CRYSTAL ICE

DE-ICING SALT

INS-FG-CRYSTAL-20 (20KG)

EFFECTIVE DOWN TO -15°C

Embrace winter with confidence using our premium white rock salt. Effective down to -15°C, it's composed of 98.5% sodium chloride for swift and budget-friendly ice and snow removal. Safe and user-friendly, making it your ultimate choice this winter!

ADVANTAGES

- Safe;
- Easy to use;
- Fast acting.

APPLICATION

Following a storm, spread Crystal Ice over the affected area. Allow a few minutes for the salt crystals to melt accumulated snow and ice. Remove slush with a shovel or scraper. Do not spread on lawn or shrubbery. Reapply as needed.

CAUTION

CONCRETE AND OTHER SURFACES:

Crystal Ice is not recommended for removing ice on concrete surfaces less than one year old, precast concrete steps, existing concrete masonry surfaces (stone, bricks and mortar joints) with apparent aggregates, or concrete that is precast, pre-stressed, spalled, cracked, crumbling or weathered. Apply only on sound concrete; application of the product to already damaged concrete may accelerate its deterioration due to freeze/thaw cycles. Crystal Ice is not recommended for de-icing wood or metal surfaces. Avoid all contact with leather items.
